

## VoIP

With PRI, SIP, and Hosted VoIP options, we can create a solution to fit your business needs. Even help you connect geographically dispersed employees and devices on one unified phone system!

### **PRI** (Primary Rate Interface):

- Full and 1/2 PRI available
- Easy deployment
- Great calling features

### **SIP** (Session Initiation Protocol):

- SIP Trunk bundles are cost effective & flexible in quantity
- Centralized management and hardware. Great for multisite businesses
- Scalable to hundreds of concurrent calls

### **Hosted Phone Service:**

- Hosted Phone Service is provisioned via PBX in the cloud allowing you to enjoy all of the calling features without the PBX hardware and management
- Simple and easy deployment
- Handset included or use your own  
(*must be an approved model*)
- Mobility application add-on available

# Your Network Your Way

It's that Simple

PURE SPEED  
**LIGHTWAVE**

## ETHERNET

### Point to Point (EPL)

Connection between two locations

### Point to Multipoint (ETREE)

Multiple sites going back to one point

### Multipoint to Multipoint (ELAN)

Multiple locations connecting to each other

### Data Centers

Connection to all major data centers in the Houston area

Ethernet redundancy with over 100 data rings throughout the Greater Houston Area. Even if there is a break in the primary pathway, when you're on one of our protected rings your connection will still be fully operational.

We can lease you Dark Fiber routes, offering high-quality network reliability, multiple speeds, and security.

Dark Fiber routes offer an optimal solution for educational institutions, carriers and data centers by providing the same level of speed, support and reliability we are known for, combined with the flexibility of managing Dark Fiber to suit the needs of your organization.

## DARK FIBER

## INTERNET

- High speed with low latency & fewer hops
- Redundancy through facilities-based data rings
- Facilities-based network
- Burstability for a boost in speed when needed
- Symmetrical and full duplex bandwidth
- Scalable network that's easily upgraded
- Carrier grade transport from 10 Mb to 100 Gb
- Fiber connection end-to-end

## SD WAN

## DATA CENTER

LIGHTHOUSE, our 12,000 sq ft data center, provides the utmost attention towards redundant power, cooling & connectivity to support physical hardware & hybrid solutions with major cloud providers.
